

Workshop Name:

Hazard Vulnerability Assessment Workshop

Workshop Overview:

One of the key components in determining an organization's probability and risk for emergencies and disasters is to conduct an annual Hazard Vulnerability Assessment (HVA). The HVA is a vital component of the Organizations' Emergency Preparedness Program and helps establish priorities for creating, educating, testing, evaluating, and revising your emergency operations plan. This workshop provides the organization with information and value of conducting an annual HVA, a hands-on experience to create their HVA and tools to conduct future HVA with their emergency planning team.

Course Objectives:

1. Review the importance and purpose of conducting an annual HVA.
2. Understand the regulatory compliance justification for conducting an annual HVA
3. Identify the types of risks and hazards faced by healthcare facilities.
4. Develop a consensus methodology to work through and score the HVA for your facility
5. Complete your annual facility-specific HVA

Recommended Participants: Healthcare Administrators and Emergency Operations Program Planning Teams

Course Length: 1.0 Hours

Prerequisites: None

Cost: \$150 per organization

Continuing Education Credits

Illinois Registered Nurses, Nursing Home Administrator and Licensed Social Workers/Licensed Clinical Social Workers. This activity has been submitted to Elderwerks for Contact Hours.
